

Instruction of China Compulsory Certification Mark Usage

(Electrical wires and cables)

1. Use of CCC mark

The applicant shall strictly comply with the Management Requirements of Certification Mark for Compulsory Product Certification, which is the attachment of Announcement on China Compulsory Product Certification Mark Reform by CNCA (Announcement No. 10 of 2018).

2. Design of the mark allowed to use

The certification mark shall be applied in the way of printing/pressing. It is allowed to adopt the standard-size mark printed in a uniform manner if there are special requirements.

Deformation mark is allowed to use. The deformation pattern of certification mark is “CCC” pattern (abbreviation for “China Compulsory Certification”), the word size should be matched with the cable size.

(Note: “X” refers to “factory code”)

3. Other special requirement

Certification mark shall be applied (by means of printing or pressing,

etc.)on outer surface of cable.

For the cable with outer braid layer, certification mark may be applied on the outer surface of insulation cores. It shall adopt the standard-size mark printed in a uniform manner, or irregular-size printing/pressing mark on their product qualified card.
